k

metallic/pearlescent finishes

Our Premium Pearls may be a little more expensive than your average run of the mill colour, but these Premium Pearls are not your usual run of the mill colour. This group of colours deliver a coating that has sparkle and movement in its appearance which means that the colour can change in different lighting and viewing angles or where the coated substrate is in several different planes.

mannex® Accent

The range of Mannex® Accent colours have been added to the Duralloy® range as demand increased for colours brighter than the usual range of colours offered, colours that could be used to complement the overall colour scheme. This range has been formulated in the Mannex® finish and has been designed for use on architectural features, such as entrance doors, aluminium louvres and panels.
